1 | QUICK RESPONSE ACROSS TOPICS

Please share your thoughts on the draft Canada Water Masterplan principles in the following areas:

The masterplan is still at an early stage so we would like to hear what's important to you, and whether you have any concerns. It is important for the team to have this information at this early stage whilst there is greatest flexibility for input and change. In response to your feedback the team will develop a more detailed masterplan and we'll be back in early 2015 with further information. On the following pages we will ask you to elaborate further on your top priorities and there is also space for further comments.
