UPDATE
NOVEMBER 2016

FIND OUT WHAT’S HAPPENING WITH THE CANADA WATER MASTERPLAN & JOIN US AT THE UPCOMING TRANSPORT SESSIONS

Birds-eye view of the sites being masterplanned together by British Land, known as the Canada Water Masterplan.
**Project update from British Land**

British Land are delighted to announce that we’ve recently purchased the Dock Manager’s Office and 1-14 Dock Offices behind Surrey Quays Road and Deal Porters Way (see map on reverse). We plan to integrate this important building into the masterplan and there is no intention to replace or change the appearance of the listed buildings.

Following the last stage of consultation, the masterplan proposals are being revised. We will be holding focus sessions and further consultation activities on the updated proposals next year; with view to submitting a planning application later in 2017.

We have recently completed refurbishment of the CWM Hub at Surrey Quays Shopping Centre. This will be a dedicated consultation space as well as being available for community use. We are in discussion with a local organisation about taking this on. Additionally, Xcite has submitted a planning application to temporarily transform the Printworks building into a mixed events venue.

We’ve also started an exciting venture with Global Generation to develop mini-workshops and work experience with local schools and community organisations.

**Transport drop-in sessions**

Please join us for two drop-in sessions to let us know about your experience of the local transport network and any thoughts on solutions.

Your comments will help to inform the development of a Transport Strategy for the Canada Water Masterplan area.

**Transport drop-in sessions**

- **Saturday 3 December 2016**
  - Walkabout | 10am - 12pm
  - Drop-in | 12pm - 3pm

- **Thursday 8 December 2016**
  - Walkabout | 6pm - 7pm
  - Drop-in | 7pm - 9pm

**Venue:** CWM Hub, opposite Tesco at Surrey Quays Shopping Centre, SE16 7LL

These are information gathering events and we would like you to share your experience of getting around the local area. We will be building a map of ideas and issues - if possible please email photos or information ahead of the session, or bring them on the day.

Before each drop-in event, we will have walkabouts to see and discuss the area first hand. On Saturday 3 December, we will have slightly longer to explore different aspects within walking distance of the shopping centre. On Thursday 8 December, this will focus on the local road network at peak time.

**RSVP not essential but if you plan on attending a walkabout it will help us cater for the right numbers.**
